Are there not more important issues that you should be spending my tax dollars on? I would hope that in today's political climate that you're time and my money would be better spent on securing our Nation. I find this another waste of our hard earned dollars having your time used by a Political Action Committee with the aim of protecting their interests and denying fair competition. I have been a subscriber for 3 years now and have not listened to AM or FM radio in that time. The poor programing, 20 minutes of commercials every hour, and the talking heads are their downfall. Please protect my freedom of choice as well as that somewhat important issue of the 1st Ammendment.
